SUMMARY

I'm currently pursuing an MSci in Software Development at OpenClassrooms while interning at App'Ines. Alongside my studies, I dedicate time to personal projects to hone my skills and explore innovative ideas.

PROJECTS

- **Narau:** A traditional japanese learning platform.
- **CosmicClassroom:** 2024 NASA Space Apps Challenge Global Nominee - Switzerland. Use AI to generate exoplanet lessons for teachers to use as resources.
- **Project Lotus:** A website that eases study using the extremely popular Pomodoro method.
- **Globuddy:** A social language exchange network that relies on an algorithm that connects people who share the same language learning goal.

LANGUAGES

Frameworks:
- AngularJS
- React/NextJS

Languages:
- CSS/SCSS/TailwindCSS
- JavaScript/TypeScript
